

ANTHONY J SIRNA GISP

Winchester, VA | 304-676-4414 | ajs2817@gmail.com

[LinkedIn](#) | [GIS Leadership Portfolio](#) | U.S. Citizen | Active TS/SCI

PROFESSIONAL SUMMARY

GIS program and solutions leader with 12+ years supporting defense, engineering, planning, and emergency-management missions. Leads staff, project delivery, data governance, customer adoption, and field operations. Experience includes enterprise GIS serving approximately 50 users, a five-year \$60 million Esri license agreement, and mobile workflows used by approximately 1,000 disaster-response inspectors. GISP with active TS/SCI and hands-on Python/ArcPy experience.

PROFESSIONAL EXPERIENCE

Community Planner and Geospatial Coordinator

U.S. Army Corps of Engineers, Middle East District | Winchester, VA | Feb 2022–Present

- Manage three GIS staff: assign work, set schedules, review performance, and coach employees. Mentor one developing GIS employee who now produces maps independently.
- Established district enterprise GIS capabilities using existing USACE Portals, supporting approximately 50 users and 12 projects annually, with an estimated 500 staff hours saved per year.
- Migrated and manage 36 datasets in one Oracle-backed enterprise geodatabase; published 36 services and built six configured applications and dashboards. Manage 10 access groups and trained 10 users.
- Set data standards for schemas, domains, subtypes, relationships, metadata, quality checks, and SDSFIE-aligned deliverables. Manage content, services, users, and permissions within existing USACE Portals.
- Led teams of up to seven on three international field-data missions in Israel, Jordan, and Kuwait. For one real estate assessment, led two one-week trips covering four installations, with a different crew of three to four on each trip.
- Develop and manage GIS project budgets, scopes, schedules, task-order requirements, independent government estimates, and acceptance criteria. Oversee contractor work and review deliverables for accuracy, completeness, and standards compliance.
- Built a GFEBs integration pilot linking approximately 10,000 records to three installation sites through a shared site identifier; flagged approximately 100 duplicate records for review. The repeatable processing workflow runs in approximately 10 minutes.
- Write Python/ArcPy workflows for geoprocessing, validation, conversion, and automation. Connect field collection, enterprise data, web services, maps, and configured Esri applications; troubleshoot synchronization, data quality, access, and application issues.
- Lead requirements sessions, demonstrations, training, and technical briefings for ARCENT, CENTCOM, engineers, planners, real-estate staff, and contractors. Integrate aerial, satellite, and UAS imagery and CAD/GIS information into planning and engineering workflows.

Emergency Management GIS Lead and Deployed GIS Specialist

U.S. Army Corps of Engineers | Collateral assignments | 2023–Present

- Completed eight disaster deployments totaling approximately 169 days, including a 69-day Los Angeles wildfire deployment. Led three onsite and three offsite GIS support staff during the Los Angeles response.
- Helped develop, administer, and sustain Field Maps and Survey123 workflows used by approximately 1,000 quality-assurance inspectors; supported onboarding, access, validation, and field troubleshooting.
- Handled approximately 10 technical requests per day, typically resolving issues within one hour. Supported QA report distribution in approximately 30 seconds.
- Built four configured products supporting commander briefings, debris metrics, contractor locations, and an internal common operating picture. Delivered maps and decision support for USACE, FEMA, state partners, and contractors during wildfire and hurricane response.

Geologist | Enterprise GIS Program and Contract Management

U.S. Army Geospatial Center | Alexandria, VA | Jan 2014–Feb 2022

- Served as Contracting Officer's Representative for a five-year, \$60 million Esri Enterprise License Agreement. Managed funding and cost allocations for the \$12 million annual agreement, reviewed invoices and deliverables, and coordinated contractor performance and compliance.
- Coordinated licensing, renewals, requirements, training, and customer support for an organization of approximately 37,000 employees operating in more than 130 countries. Connected federal customers, leadership, contracting staff, and Esri to resolve needs and support adoption.
- Developed geospatial analyses, databases, web applications, StoryMaps, and imagery-based products for military planning, facilities, civil works, and water resources. Authored approximately six Water Aerial Appraisals providing country- and watershed-level decision support.

ADDITIONAL LEADERSHIP AND PROJECT EXPERIENCE

Firefighter and Paramedic | 2002–2010: Periodically led teams of up to seven during eight years in emergency services.

Berkeley County, West Virginia: Produced fire and EMS response analysis using incident data, NFPA 1710 benchmarks, call concurrency, workload, and station-location analysis to support public-safety planning.

EDUCATION AND CREDENTIALS

B.S., Geology | James Madison University | 2013

Geographic Information Systems Professional (GISP) | Certified 2024

Army Civilian Education System | Foundation, Basic, and Intermediate

Additional Training | Master Planning Principles; DD Form 1391 Prospect Development

Recognition | Department of the Army Civilian Service Achievement Medal, 2023; Department of Defense SMART Scholarship; Eagle Scout

Selected Presentation | "Sampling Methods for Measuring Stream Scour," GeoHazards, 2014

TECHNOLOGY AND DELIVERY SKILLS

ArcGIS Pro, Enterprise, Portal, Online, and ArcMap; Field Maps, Survey123, Experience Builder, Dashboards, and StoryMaps; enterprise and file geodatabases; Oracle-backed geospatial data; map and feature services; data modeling, metadata, QA/QC, and SDSFIE; Python/ArcPy; imagery analysis; requirements discovery, demonstrations, contractor oversight, and user training. Working knowledge of Civil 3D, Revit, and ProjectWise; basic R.
